

NEW! BREAKTHROUGH HIV PRODUCT FROM ALLIANCE BIO-MEDICAL ATLANTA, GA USA.

Did you know that with this new breakthrough product from Alliance Bio-Medical you or others can know their HIV Status using only one drop of urine in 1 minute or less with 99% accuracy and in privacy!

The New Alliance Bio-Medical Rapid HIV (1&2) Urine Detection Test Kit is:

- **Rapid**
Provides results in 1 minute or less, enabling people to learn their HIV status and to be connected to care immediately if positive through our Know Your Status Right Now (KYSRN!) Partners
- **Convenient**
Due to its urine sample type it does not involve blood draws, finger pricks or needle stick injuries. Ideal for private use: anyone can test themselves or other anywhere and at any time. Also ideal for use in clinical settings, military facilities and rural settings
- **Accurate**
Greater than 99% agreement with confirmatory Western blot.
- **Simple**
Uses only one drop of urine and is extremely easy to use by any-one. Offers the ability to test in non-traditional testing environments, such as in rural areas, outreach programs and mobile testing clinics.
- **Patient-Preferred**
Offers patients accurate HIV testing without the need for blood or needles. Pain-free testing with urine means more people get screened, more HIV positive patients are connected to care and fewer people are exposed.
- **Extensively tested**
By many reputable organizations in World Health Organization Medical Research Center, NIMR and Shell Oil.
- **The Official HIV Detection System of the Know Your Status Right Now (KYSRN!) Program. (www.kysrn.org)**
- **NAFDAC Approved**
- **Affordable**

Instantly know the HIV status of yourself, sexual partners, employees and domestic workers any time and anywhere.

The New Alliance Bio-Medical Rapid HIV (1&2) Urine Detection Test.

FOR IMMEDIATE PRESS RELEASE

Revolutionary HIV Urine Detection Kit : Call for Healthcare Distributors/Agents

Alliance Bio-Medical, Atlanta GA USA Launches its Breakthrough Rapid HIV (1&2) Urine Detection Test .

Atlanta, Georgia (Jan 17, 2011) -- HIV infections affect 33 million people around the world, disproportionately so in Sub-Saharan Africa. Unsafe sexual practices and poor economic conditions in some parts of the world make this an easy to spread virus, which is subsequently expensive to treat. Some developing countries are spending up to 30% of their health care budget on HIV treatments. Young people and women are at greatest risk. In Nigeria over 60% of new HIV infections are in the 15-24 age group. Women account for over 60% of new infections. Voluntary testing is negligible due to stigma attached. Alliance Bio-Medical and KYSRN have turned their attention to addressing this problem, first in Nigeria, and subsequently in Sub Saharan Africa.

Alliance Bio-Medical, Atlanta GA USA announces a call for healthcare distributors/agents for its breakthrough HIV Urine Detection Kit in Nigeria and Africa. Using Alliance Bio-Medical's Breakthrough Rapid HIV (1&2) Urine Test kits, participants can learn their HIV status in 1 minute or less. In addition people that test positive can be immediately linked to follow-up care through Alliance Bio-Medical's Know Your Status Right Now (KYSRN!) partners. The revolutionary Alliance Bio-Medical Rapid HIV (1&2) Urine Detection Test offers a more convenient option of testing for HIV.

The Alliance Bio-Medical Rapid HIV Urine test offers particular advantages: It is extremely easy to use and requires only one drop of urine for testing. Due to the urine sample type used for the test, the test avoids needle prick injuries required for blood tests or the use of syringes and needles for blood draws. It offers convenience for any-one to test themselves or others privately, anytime and anywhere with accuracy of 99%. The results of the test can be obtained extremely quickly. Usually in about a minute or less people can know their HIV Status.

The Alliance Bio-Medical Rapid HIV (1&2) Urine Detection Test has been extensively tested by leading research organizations in Nigeria such as the Nigerian Medical Research Institute. It is approved by the Nigeria Regulatory Agency -NAFDAC. In addition it is used by Shell Oil, Nigeria for its health programs.

Alliance Bio-Medical plans to host a series of Know Your Status Right Now (KYSRN!) events targeted at young adults and the general public in collaboration with Government Agencies, Non Governmental Organizations (NGOs), Celebrities and other entities. Most recently a KYSRN! workshop in collaboration with the Lagos State AIDSS Control Agency was held with FREE HIV testing was provided to the general public using the Alliance Bio-Medical Rapid HIV (1&2) Urine Detection tests. Other KYSRN events planned for 2011 in Nigeria.

According to its Senior Executive Ms Zizi Joseph, “Creating effective partnerships with key organizations and professions especially Pharmacists, Medical Professionals is a key to reducing the incidence of HIV in Africa”.

For more information about becoming an Agent or Distributor, request a Distributor/Agent Application Attn: Distributor Administrator Ms Gloria Canales at info@alliancebiomed.com or call 1-888-246-7101 (USA) or in Nigeria send text with email address to 0816 456 7516.

To inquire about bringing a KYSRN Workshop/Event to your community contact Linda Williams at info@kysrn.org.
